

LIFE17 ENV/SK/000355 - Systematic use of contaminant data from apex  
predators and their prey in chemicals management

## LIFE APEX

<https://lifeapex.eu/>

**LIFE APEX and the contribution of natural science collections to pan-European contaminant monitoring in apex predators**

*JAROSLAV SLOBODNIK, ENVIRONMENTAL INSTITUTE, SLOVAKIA*

# LIFE APEX

## PROJECT LOCATION:

Germany, Greece, Italy, Netherlands,  
Slovakia, United Kingdom

## BUDGET INFO:

Total amount: **3,353,413 Euro**

60 % EC Co-funding: **2,012,047 Euro**

## LOCATION OF BENEFICIARIES

DURATION: Start: 01/09/2018 - End: 31/08/2022

## PROJECT'S IMPLEMENTORS:

Coordinating Beneficiary: Environmental Institute (SK)

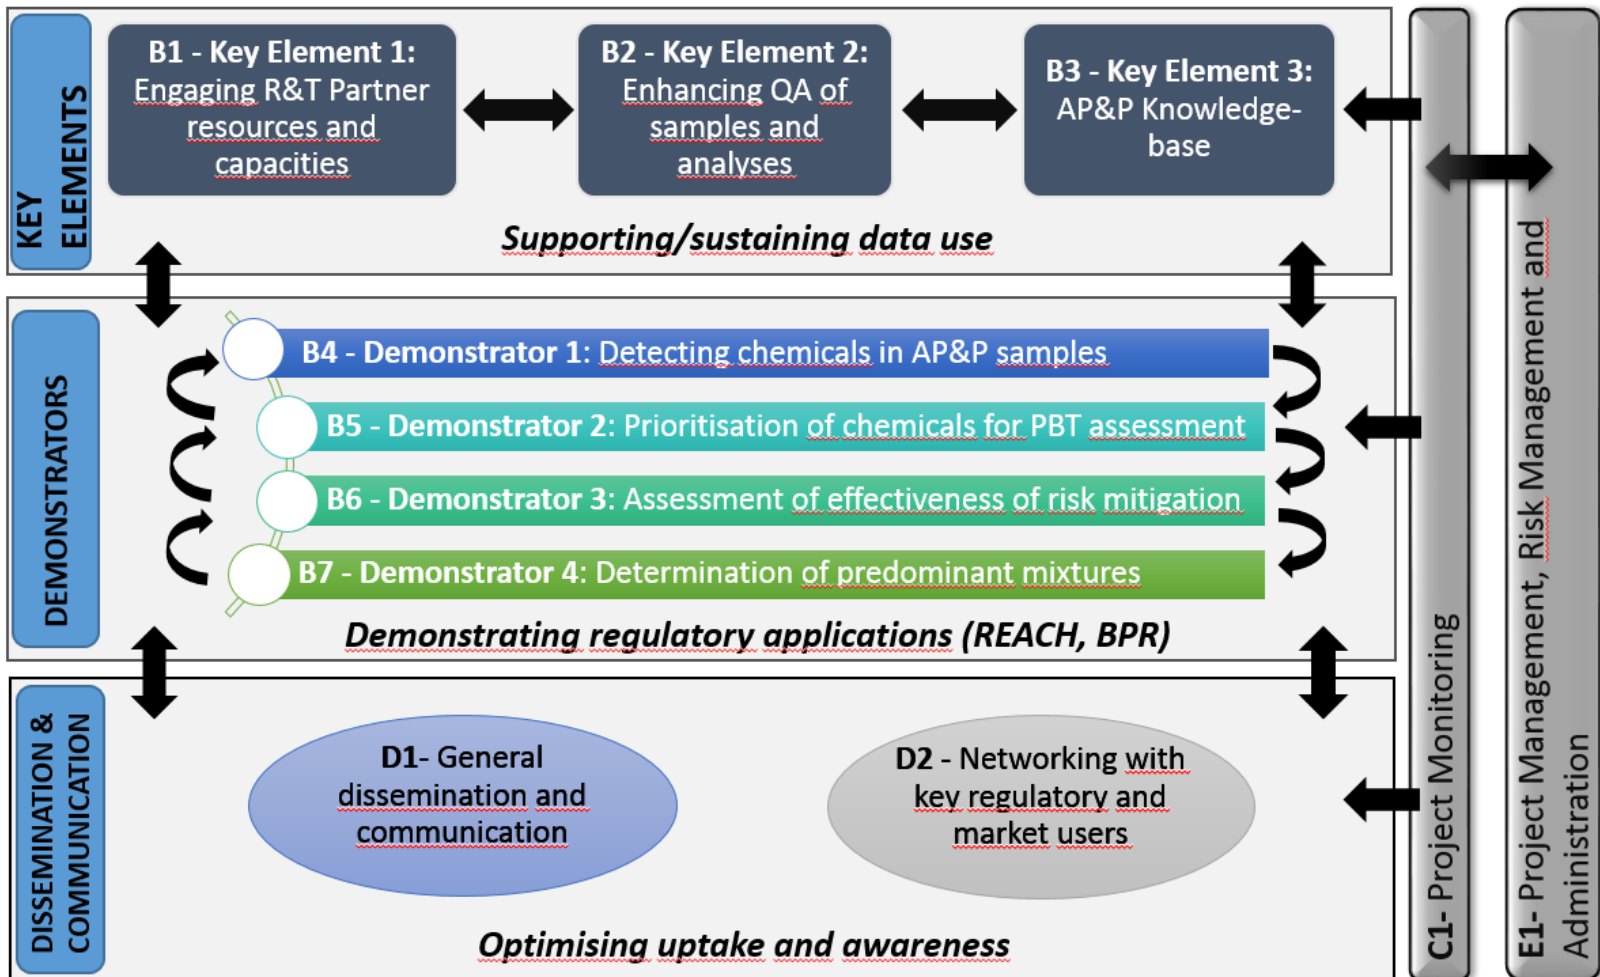

Associated Beneficiaries: CEH (UK), Fh-IME (DE), Naturalis (NL), UBA (DE), UNIFI (IT), UoA (GR)

# KEY ELEMENTS & DEMONSTRATORS

## OUTLINE OF LIFE APEX

# LIFE APEX

## Presence of chemical contaminants

- ▶ AP&P analysed by NORMAN non-target screening workflow
- ▶ **Tier 1 - Does it work?**
  - ▶ Samples from ESBs and NHMs in DE, NL, SE, UK (12/67)
- ▶ **Tier 2 - Can we look back at the pollution pattern?**
  - ▶ ESBs and research collections from 2000 - 2019 (19/65)
- ▶ **Tier 3 - What do we see around Europe?**
  - ▶ Samples of top predators from all European Sea Regions (20/60)
- ▶ **LIFE APEX Database System - FAIR**

# Emerging substances in AP&P

LIFE APEX Tier 1 samples (67) – Results of target analyses (116 substances) and wide-scope target screening (2,316 substances) of chemical contaminants in top predators and their prey (in µg/Kg w.w. unless otherwise stated)

Shown only concentrations above LOD

Select contaminants

- 1,2,3,4,7,8-HxCDF (pg/Kg w.w.)
- 1,2,3,6,7,8-HxCDF (pg/Kg w.w.)
- 1,2,3,7,8,9-HxCDF (pg/Kg w.w.)
- 2,3,4,6,7,8-HxCDF (pg/Kg w.w.)
- 1,2,3,4,6,7,8-HpCDF (pg/Kg w.w.)
- OCDF (pg/Kg w.w.)
- Total - PCDD/F/dlPCB (TEQ) (pg/Kg w.w.)
- Industrial Chemicals - Phosphates**
- Triisobutyl phosphate (TIBP) (µg/Kg w.w.)
- Tris(2-chloroethyl) phosphate (TCEP) (µg/Kg w.w.)
- Tris(2-chloroisopropyl)phosphate (TCPP) (µg/Kg w.w.)**
- Tris(1,3-dichloro-2-propyl) phosphate (TDCIPP) (µg/Kg w.w.)
- Triphenyl phosphate (TPHP) (µg/Kg w.w.)
- 2-Ethylhexyl diphenyl phosphate (EHDP) (µg/Kg w.w.)
- Tris(2-ethylhexyl) phosphate (TEHP) (µg/Kg w.w.)
- Tributyl phosphate (TBP) (µg/Kg w.w.)
- Industrial chemicals - Polybrominated diphenyl ethers**
- 2,4,4-Tribromodiphenyl ether (BDE-28) (µg/Kg w.w.)
- 2,2,4,4-Tetrabromodiphenyl ether (BDE-47) (µg/Kg w.w.)
- 2,3,4,4-Tetrabromodiphenyl ether (BDE-66) (µg/Kg w.w.)
- 2,2,4,4,6-Pentabromodiphenyl ether (BDE-100) (µg/Kg w.w.)
- 2,2,4,4,5-Pentabromodiphenyl ether (BDE-101) (µg/Kg w.w.)

# What do we see?

## Perfluorooctanesulfonic acid (PFOS) common Buzzards (UK)

# LIFE APEX Database System -

<https://www.norman-network.com/apex/>

## ▶ Substance Database

- ▶ 106,545 substances

## ▶ Sample Catalogue

## ▶ Chemical Occurrence Data

- ▶ Data: Total 719,518/ APEX 458,873/ **Raptors 96,679**
- ▶ Substances: 2,937

## ▶ Digital Sample Freezing Platform - retrospective screening

LIFE APEX DS → NORMAN DS → EC IPCHEM

Title	Veterinary examination and tissue archive for birds of prey found dead within Germany
Country of origin	Germany
Species Common name	Common buzzard
Species Latin name	Buteo buteo
Habitat type	Terrestrial
Sample type	Various
Access restrictions	On a case by case basis
Health and safety (H&S) issues	Biological hazard
Start date	1999
End date	ongoing
Lineage	Passive and targeted collection
Physical state	Frozen (-20oC)
Storage container	Bag: plastic
<b>Number of samples</b>	<b>&lt;1,000</b>
ISO19115 INSPIRE Topic category	Biota
ISO19115 INSPIRE Topic category	Environment
SOP used for sample collection?	No
SOP used for archiving?	Yes
Contact name	Dr. Oliver Krone/Alexander Badry
Contact email address	<a href="mailto:krone@izw-berlin.de">krone@izw-berlin.de</a> ; <a href="mailto:badry@izw-berlin.de">badry@izw-berlin.de</a>
Archive location - address line 1	Alfred Kowalke Str. 17
Archive location - address line 2	
Archive location - address line 3	
Archive location - address line 4	
Archive location - village/town/city	Berlin
Archive location - county	Berlin
Archive location - postcode	10315
Archive location - country	Germany
Keywords	birds of prey, liver samples, cause of death, veterinary examination, parasitology, toxicology
Website url	<a href="http://www.izw-berlin.de/welcome.html">http://www.izw-berlin.de/welcome.html</a>
Additional Resources	

## EXAMPLE

Sample code:

APEX1-Bb(Lp)-GB(6)-2017

Provider's code:

20549 (19694/19410/19409)

**Sex, age, weight, tissue, cause of death etc. stored in the Data Collection Templates linked to the analytical results**

# Retrospective suspect screening in digitally-stored samples (NORMAN DSFP)

Interactive spatial and temporal distribution of CEC in LIFE APEX samples

Wide-scope suspect screening for LIFE APEX samples

**Selection of data**

Compounds with experimental fragments

Compounds with:

Frequency of appearance

---

**Appearance**

Height

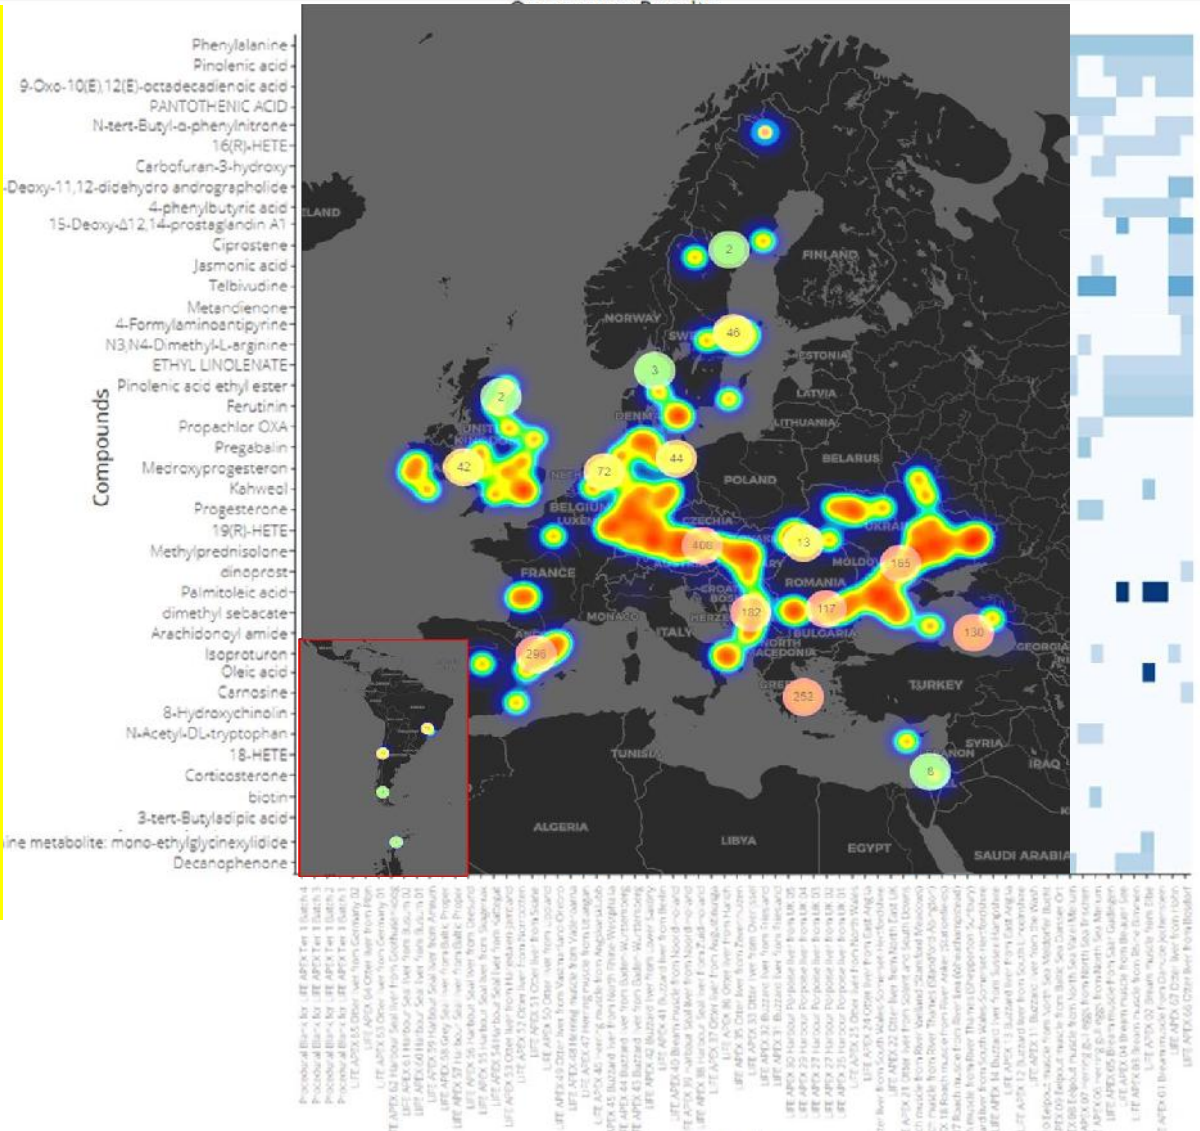

Width

Size Letters Y

Size Letters X

Rotation of labels on x-axis

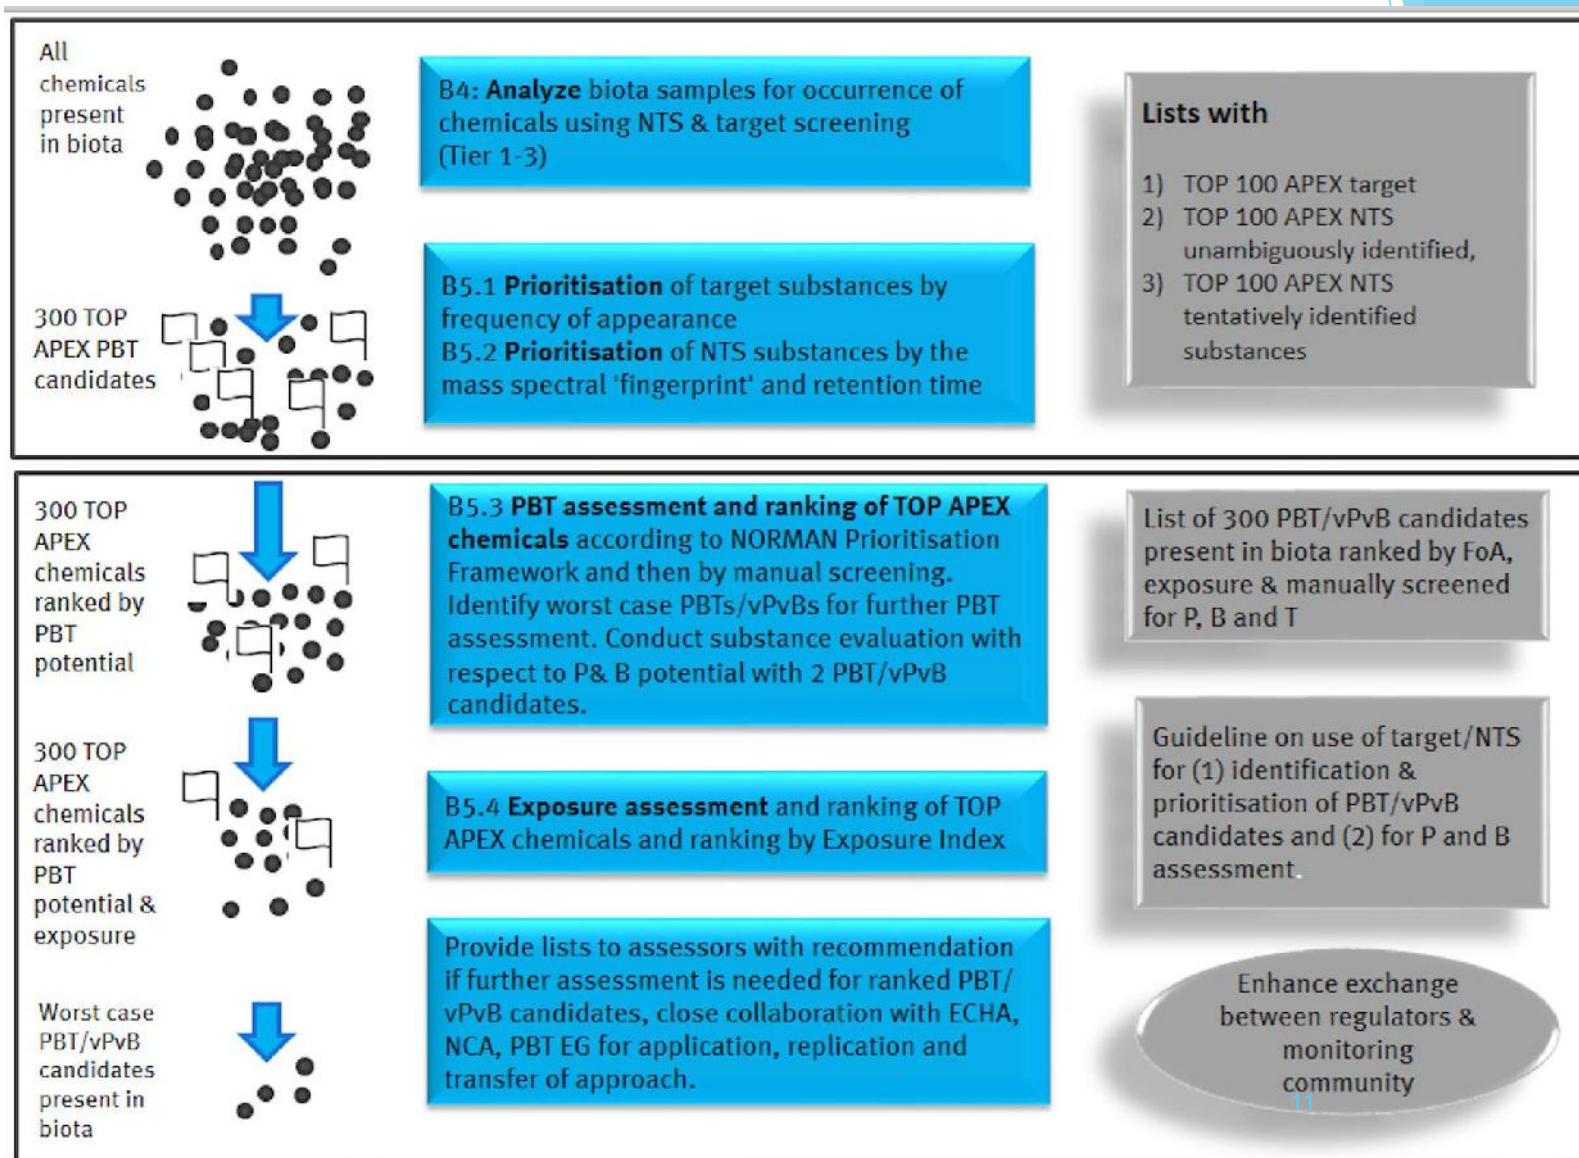

**65,545 substances in EACH sample - presence/absence/semi-quantification**

**At present >1,800 environmental samples >117 million data**

# CHEMICAL ANALYSIS & PRIORITIZATION SCHEME

# Prioritisation based on automated calculation of Risk + Hazard + Exposure scores

## ▶ Model predicted values/scores (0-1)

- ▶ **RISK**: Exceedance of ecotoxicity threshold values - today **64,448** substances in NORMAN Ecotoxicology database; <https://www.norman-network.com/nds/ecotox/>
- ▶ **HAZARD**: Persistence (P), bioaccumulation (B), toxicity (T) properties - >**106,000** substances; UBA DE; JANUS QSAR tool; <https://www.vegahub.eu/portfolio-item/janus/>
- ▶ **EXPOSURE**: KEMI Hazard Score - use information and annual tonnage from regulatory databases (e.g. the REACH registry); **94,270** substances <https://www.norman-network.com/nds/susdat/>

## ▶ Experimental values

- ▶ Literature, accessible ecotox databases
- ▶ EU MS; **Cooperation with OSPAR, HELCOM, BSC**

# In support of regulatory uptake - need for

## **ONE SUBSTANCE, ONE ASSESSMENT**

- ▶ European infrastructure for hosting harmonised quality controlled data
  - ▶ List of available samples
  - ▶ List of substances - **unique identifiers**
  - ▶ Target monitoring data from ESBs, NHMs, research collections
  - ▶ Non-target/Suspect screening - **IT IS NOT A RESEARCH ANYMORE!**
  - ▶ Ecotoxicity threshold values - adapted to raptors
- ▶ European Early Warning System for chemicals - Top predators an important part!

# NEWSLETTER LIFE APEX

ISSUE NO. 5 | DECEMBER 2020

 **YouTube** <https://youtu.be/7y3zDawHDCK>

LifeAPEX - Project video

## Telegram

- +++New Life Apex project video is available on [Youtube](https://youtu.be/7y3zDawHDCK)+++
- Novel analytical techniques for PFAS were developed
- Results for Tier 2 time-trend analysis (2000-2018) are available
- Detection of novel compounds that have not been reported in Tier 1
- Many PFAS show declining trends in otters from the UK and harbour seals from Germany
- Similar trends were observed for mercury in bream (Germany).
  - However, levels were above the environmental quality standard (20 µg/kg wet weight)
- BDEs were declining in otters (UK) and bream (Germany) as well
- 64 Buzzard samples were shipped to the University of Florence for assessing the impact and effectiveness of risk management measures for legacy pollutants at national and European scale
- Sample selection across Europe (Tier 3) has been finalized
  - Wide spatial coverage of available samples

The Life APEX-Team wishes you Merry Christmas and a Happy New Year!

## TOPIC 01

- Presentation of novel analytical techniques
- Tier 2 time-trend results

## TOPIC 02

- Demonstrator 3 (Common Buzzard)

## TOPIC 03

- Virtual project meeting in June, 2020
- Sample selection for Tier 3
- Networking activities
